J&L Electrical Services State Certified as DBE for Mn/DOT

Hudson, Wisconsin – October 2011 - J&L Electrical Services, (dba J&L Steel & Electrical Services,) is pleased to announce its' recent certification as a Disadvantage Business Enterprise (DBE) for the State of Minnesota Department of Transportation. The designation falls under the Uniform Certification Program (Mn/UCP) which is made up of the Minnesota Department of Transportation (Mn/DOT), Metropolitan Airports Commission (MAC) and Metropolitan Council, along with other state and local transportation authorities that are recipients of federal funds for transportation projects.

The Minnesota Unified Certification Program (Mn/UCP) was established in accordance with Federal regulations (49 CFR Part 26) to offer a "one-stop" shop for certification of Disadvantaged Business Enterprises (DBEs) on U.S. Department of Transportation contracts in Minnesota.

J&L Electrical Services was established in 2008 when LouAnne Berg, C.E.O., expanded her steel erection company to include electrical services. "We 'keep our clients out of the dark' and we are very excited about this new opportunity for business with the state," commented LouAnne. J&L provides quality union workmanship with an honest approach to business. Safety and integrity is a top priority at J&L. All types of electrical work are offered to include commercial, industrial, institutional, highway heavy, new construction, expansions and service contract work.

About J&L Steel & Electrical Services

J&L Steel & Electrical Services has been installing structural and reinforcing steel since 1977. In 2008 services were expanded to include electrical commercial, industrial and service work. Safety is our number one priority and we can help you meet project participation goals with ease and confidence.
